TRAFFIC CONTROL SOLUTIONS

Slow down and divert all types of traffic, from pedestrians to HGVs.

We offer a superb range of durable traffic control solutions including speed ramps, parking kerbs and cable protectors, each designed to safely redirect and manage traffic in any situation. Every product in the collection is made using a long-lasting, industry approved, NR/SBR rubber blend designed to help you effectively slow, or divert, all types of traffic. If you're after something even stronger, then we've got you covered with a range of products created using our super durable TPX or Type Cord Hi-fibre reinforced rubber.

WHY USE CABLE PROTECTORS

- Protect your cables, cords, and hose lines from pedestrian traffic, vehicle traffic and heavy-duty equipment movement
- Ideal for local events, festivals, sporting events, construction sites, conventions centers, manufacturing floor, or warehouse
- Cost-effective solution helps prevent damage caused by wire vibration, contact with other heat producing equipment or from tripping/cable pull
- Improve accessibility Cable protection systems are offered in a variety of sizes to suit all types of INDOOR/OUTDOOR applications.

WHAT TO CONSIDER

Size - How many cables do you want to protect? Protect 1, 2, 4, or 5 cables within the same cable protection system.

Cable Diameter - Make sure that your cables will fit into the cable protector by choosing the proper channel width and height.

Load Capacity - What will be crossing the path of the cables? With capacities up to 800,000 lbs. per axle (load that a vehicle will put on a cable protectors as they drive over them), cable protectors can withstand thousands of pounds and endure constant impact.

Hinged lid for easy cable placement

Tread design provides excellent traction

Integrated connectors extend track to desired length
