TRAFFIC CONTROL SOLUTIONS

Slow down and divert all types of traffic, from pedestrians to HGVs.

We offer a superb range of durable traffic control solutions including speed ramps, parking kerbs and cable protectors, each designed to safely redirect and manage traffic in any situation. Every product in the collection is made using a long-lasting, industry approved, NR/SBR rubber blend designed to help you effectively slow, or divert, all types of traffic. If you're after something even stronger, then we've got you covered with a range of products created using our super durable TPX or Type Cord Hi-fibre reinforced rubber.

WHY USE CABLE PROTECTORS

- Protect your cables, cords, and hose lines from pedestrian traffic, vehicle traffic and heavy-duty equipment movement
- Made of industrial grade rubber. It is high strength, no deformation, this heavy duty cable protector ramp For most small or large cars, it can be used with confidence whether indoors or outdoors.
- Cost-effective solution helps prevent damage caused by wire vibration, contact with other heat producing equipment or from tripping/cable pull
- Improve accessibility Cable protection systems are offered in a variety of sizes

*Keeps the road safe for car/light van traffic while you run temporary cables over it. There are textured strips on the surface to allow vehicles to pass without slipping; the bottom shock absorber has great stability and can control the speed without damaging the car or the road.

WHAT TO CONSIDER

INSTALLATION : Heavy duty speed bumps can be spliced together, allowing multiple cable guard ramps to be connected. With pre-drilled holes on the surface, it is completed to be bolted on gravel, asphalt or concrete pavements.

Caliber: Used to Place Cables, Wires, etc.

Bottom Pressure Resistant

Black and Yellow for High Visibility
