PET REFLECTIVE TAPES

PET high temperature tape is made of polyester film as backing, coated with silicone pressure sensitive adhesive. It has the characteristics of high temperature resistance, not easy to break when connecting, high adhesion, soft and appropriate, no glue residue after tearing off, acid and alkali resistance, corrosion resistance, and leakage prevention.

Spray high-temperature shielding : High Temperature PET Tape is suitable for surface protection during me plating, high-temperature spraying, and painting.

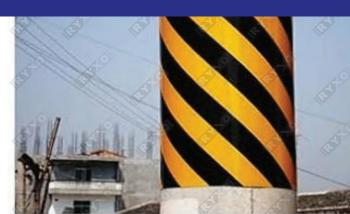

For use in electronic appliances : High Temperature PET Tape is not only heat-resistant, but it also provides insulation and anti-static properties. It can be used as insulation material for electronic products For use in mold-cutting applications : High temperature pet tape can be processed into sheets by die-cuttir and applied in production, which can significantly improve production efficiency and reduce production costs.

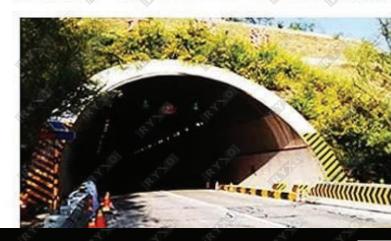

Can be reused multiple times : High temperature pet tape can also be reused and can be replaced with different types. In addition to providing excellent shielding and protection for electronic products
